Tire Science and Technology
Index to Volume 20
1992

Number	Months	Pages
1	Jan.–Mar.	1–72
2	Apr.–Jun.	73–130
3	Jul.–Sep.	131–198
4	Oct.–Dec.	199–270

A

Adaptive control
  Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181
Ahn, J. R.: *see* Kim, N. J., Park, B. K., and Ahn, J. R.
Akasaka, T., Kabe, K., Koishi, M., and Kuwashima, M.: Analysis of the contact deformation of tread blocks, Oct.–Dec., 230
Akasaka, T., Kato, M., and Wakatsuki, H.: Interply shear stresses and coupled deformations of a folded belt structure under extension, Jul.–Sep., 154
Aspect ratio
  Effects of aspect ratio on the stresses and deformations of radial passenger tires (Wu and He), Apr.–Jun., 74

B

Bass, J. M.: *see* Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.
Becker, E. B.: *see* Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.
Braking
  Finite element analysis of tire/rim interface forces under braking and cornering loads (Jeusette and Theves), Apr.–Jun., 83
Buckling
  Reinforcing function of polymer cords embedded in rubber under compression (Du, Qu, Wan, Ma, Yao, and Jiang), Oct.–Dec., 254

C

Chow, C. L. and Lu, T. J.: Fatigue crack propagation in metals and polymers with a unified formulation, Apr.–Jun., 106
Compression
  Reinforcing function of polymer cords embedded in rubber under compression (Du, Qu, Wan, Ma, Yao, and Jiang), Oct.–Dec., 254
Compressive force
  Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230
Computer modeling
  Finite element analysis of tire/rim interface forces under braking and cornering loads (Jeusette and Theves), Apr.–Jun., 83

Contact patch
The three-dimensional contact patch stress field of solid and pneumatic tires (Pottinger), Jan.–Mar., 3
Contact pressure
Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230
Cord-rubber composites
Effects of aspect ratio on the stresses and deformations of radial passenger tires (Wu and He), Apr.–Jun., 74
Reinforcing function of polymer cords embedded in rubber under compression (Du, Qu, Wan, Ma, Yao, and Jiang), Oct.–Dec., 254
Cornering
Finite element analysis of tire/rim interface forces under braking and cornering loads (Jeusette and Theves), Apr.–Jun., 83
Costemalle, B.: Tire pressure loss and intracarcass pressure modeling, Oct.–Dec., 200
Coupled deformations
Interplay shear stresses and coupled deformations of a folded belt structure under extension (Akasaka, Kato, and Wakatsuki), Jul.–Sep., 154
Cyclic J-integral
Fatigue crack propagation in metals and polymers with a unified formulation (Chow and Lu), Apr.–Jun., 106

D

Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.: Reinforcing function of polymer cords embedded in rubber under compression, Oct.–Dec., 254
Dynamics
Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181

E

Energy dissipation
Fatigue crack propagation in metals and polymers with a unified formulation (Chow and Lu), Apr.–Jun., 106
Energy method
Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230

F

Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.: Tire modeling by finite elements, Jan.–Mar., 33
Fatigue crack propagation
Fatigue crack propagation in metals and polymers with a unified formulation (Chow and Lu), Apr.–Jun., 106
Fatigue threshold
Fatigue crack propagation in metals and polymers with a unified formulation (Chow and Lu), Apr.–Jun., 106
Finite element analysis
Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230

Effects of aspect ratio on the stresses and deformations of radial passenger tires (Wu and He), Apr.–Jun., 74
Finite element analysis of tire/rim interface forces under braking and cornering loads (Jeusette and Theves), Apr.–Jun., 83
Tire modeling by finite elements (Faria, Oden, Yavari, Tworzydlo, Bass, and Becker), Jan.–Mar., 33
Folded belt
Interply shear stresses and coupled deformations of a folded belt structure under extension (Akasaka, Kato, and Wakatsuki), Jul.–Sep., 154
Footprint
The three-dimensional contact patch stress field of solid and pneumatic tires (Pottinger), Jan.–Mar., 3
Force
The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement (Pottinger), Jul.–Sep., 132

H

He, X. M.: *see* Wu, G. Z. and He, X. M.

I

Ide, H.: *see* Murakoshi, H., Ide, H., and Nishihata, S.
Inflation pressure
Tire pressure loss and intracarcass pressure modeling (Costemalle), Oct.–Dec., 200
Innerliner
Tire pressure loss and intracarcass pressure modeling (Costemalle), Oct.–Dec., 200
Interply shear stress
Interply shear stresses and coupled deformations of a folded belt structure under extension (Akasaka, Kato, and Wakatsuki), Jul.–Sep., 154
Intracarcass pressure
Tire pressure loss and intracarcass pressure modeling (Costemalle), Oct.–Dec., 200

J

Jeusette, J. P. and Theves, M.: Finite element analysis of tire/rim interface forces under braking and cornering loads, Apr.–Jun., 83
Jiang, J. Y.: *see* Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.

K

Kabe, K.: *see* Akasaka, T., Kabe, K., Koishi, M., and Kuwashima, M.
Kato, M.: *see* Akasaka, T., Kato, M., and Wakatsuki, H.
Kim, N. J., Park, B. K., and Ahn, J. R.: A study on the analysis of surface stresses of pneumatic tires by the photoelastic method, Jan.–Mar., 57
Kline, S. M.: Model reference adaptive control of a tire test machine, Jul.–Sep., 181
Koishi, M.: *see* Akasaka, T., Kabe, K., Koishi, M., and Kuwashima, M.

Kuwashima, M.: *see* Akasaka, T., Kabe, K., Koishi, M., and Kuwashima, M.

L

Lu, T. J.: *see* Chow, C. L. and Lu, T. J.

M

Ma, H.: *see* Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.

Measurement
The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement (Pottinger), Jul.–Sep., 132

Modeling
Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181

Model reference control
Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181

Moment
The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement (Pottinger), Jul.–Sep., 132

Murakoshi, H., Ide, H., and Nishihata, S.: An approach to vehicle pull using a tire finite element model, Oct.–Dec., 212

N

Nishihata, S.: *see* Murakoshi, H., Ide, H., and Nishihata, S.

O

Oden, J. T.: *see* Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.

P

Park, B. K.: *see* Kim, N. J., Park, B. K., and Ahn, J. R.

Photoelastic
A study on the analysis of surface stresses of pneumatic tires by the photoelastic method (Kim, Park, and Ahn), Jan.–Mar., 57

Pottinger, M. G.: The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement, Jul.–Sep., 132

Pottinger, M. G.: The three-dimensional contact patch stress field of solid and pneumatic tires, Jan.–Mar., 3

Pressure Loss
Tire pressure loss and intracarcass pressure modeling (Costemalle), Oct.–Dec., 200

Q

Qu, W.: *see* Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.

R

Radial
The three-dimensional contact patch stress field of solid and pneumatic tires (Pottinger), Jan.–Mar., 3

Reinforcing function
Reinforcing function of polymer cords embedded in rubber under compression (Du, Qu, Wan, Ma, Yao, and Jiang), Oct.–Dec., 254
Residual aligning torque
An approach to vehicle pull using a tire finite element model (Murakoshi, Ide, and Nishihata), Oct.–Dec., 212
Residual lateral force
An approach to vehicle pull using a tire finite element model (Murakoshi, Ide, and Nishihata), Oct.–Dec., 212
Rolling contact
Tire modeling by finite elements (Faria, Oden, Yavari, Tworzydlo, Bass, and Becker), Jan.–Mar., 33
Rolling friction
Tire modeling by finite elements (Faria, Oden, Yavari, Tworzydlo, Bass, and Becker), Jan.–Mar., 33

S

Shearing force
Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230
Solid tire
The three-dimensional contact patch stress field of solid and pneumatic tires (Pottinger), Jan.–Mar., 3
Static self-aligning torque
An approach to vehicle pull using a tire finite element model (Murakoshi, Ide, and Nishihata), Oct.–Dec., 212
Steering pull
An approach to vehicle pull using a tire finite element model (Murakoshi, Ide, and Nishihata), Oct.–Dec., 212
Stresses
The three-dimensional contact patch stress field of solid and pneumatic tires (Pottinger), Jan.–Mar., 3
Suspensions
Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181

T

Theves, M.: *see* Jeusette, J. P. and Theves, M.
Tire modeling
Tire modeling by finite elements (Faria, Oden, Yavari, Tworzydlo, Bass, and Becker), Jan.–Mar., 33
Tire properties
Effects of aspect ratio on the stresses and deformations of radial passenger tires (Wu and He), Apr.–Jun., 74
Tire/rim forces
Finite element analysis of tire/rim interface forces under braking and cornering loads (Jeusette and Theves), Apr.–Jun., 83
Tire strains
A study on the analysis of surface stresses of pneumatic tires by the photoelastic method (Kim, Park, and Ahn), Jan.–Mar., 57
Tire stresses
A study on the analysis of surface stresses of pneumatic tires by the photoelastic method (Kim, Park, and Ahn), Jan.–Mar., 57

Tire testing
Model reference adaptive control of a tire test machine (Kline), Jul.–Sep., 181
Torque
The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement (Pottinger), Jul.–Sep., 132
Tread block
Analysis of the contact deformation of tread blocks (Akasaka, Kabe, Koishi, and Kuwashima), Oct.–Dec., 230
Tworzydlo, W. W.: *see* Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.

U

Uniformity
The Flat-Trac II machine, the state-of-the-art in tire force and moment measurement (Pottinger), Jul.–Sep., 132

V

Vehicle pull
An approach to vehicle pull using a tire finite element model (Murakoshi, Ide, and Nishihata), Oct.–Dec., 212
Viscoelastic bodies
Tire modeling by finite elements (Faria, Oden, Yavari, Tworzydlo, Bass, and Becker), Jan.–Mar., 33

W

Wakatsuki, H.: *see* Akasaka, T., Kato, M., and Wakatsuki, H.
Wan, Z. M.: *see* Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.
Wu, G. Z. and He, X. M.: Effects of aspect ratio on the stresses and deformations of radial passenger tires, Apr.–Jun., 74

Y

Yao, M.: *see* Du, X. W., Qu, W., Wan, Z. M., Ma, H., Yao, M., and Jiang, J. Y.
Yavari, B.: *see* Faria, L. O., Oden, J. T., Yavari, B., Tworzydlo, W. W., Bass, J. M., and Becker, E. B.
